MISCELLANEOUS

KEELER PSL Classic Hand Held Slit Lamp

Precision machined aluminium chassis

Keeler designed and manufactured with the strength to withstand the daily traumas of the demanding ophthalmic environment. Lightweight, durable and robust.

Advanced optics, x10 & x16 magnifications

Top quality multi layered glass is crafted into our Keeler multi-element and multi-layer coated optical system to give maximum performance. Clarity is guaranteed.

Controllable illumination

Proven halogen illumination system with over 2,000 hours of bulb life; illumination levels are controlled by a rheostat giving you control of your examination parameters. From zero to maximum, you choose.

Big Slit Lamp features, Portable usability

Unique features such as the fixation targets, and the 1mm square light patch for assessing a/c flare set the new standard for Portable Slit Lamps.

Keeler

KOWA SL-17 Portable Slit Lamp

20,000 lux white LED source

Illumination is thumb wheel controlled and illuminated for easy viewing in a dark room

Powered by AAA batteries

Compatible with AAA rechargeable and AAA dry cell batteries – up to 130 minutes continuous light

Patient Operating Chairs & Beds

Frastema 88FA COMFORT Ophthalmic Chair

A steel chair covered in ABS, the headrest can be tilted and adjusted for height. The armrest and legrest tilt together with the backrest movement, transforming the chair into a procedure table. The raising, lowering and tilting controls are placed on both sides of the backrest. At the base, an electric sliding movement control is available (10cm stroke) as an option.

DOCKX Dynamic Operating Chair

The DOCKX Dynamic Operating Chair is an innovative and multidisciplinary mobile operating chair/table which can be tuned to the needs of the patient and the operating team.

"Quick-Fix" Head Support - allows the head to be fixed in a good ergonomic position.

Excellent Stability - solid build and internal electronic brake system ensure the surgeon and patient maximum stability during the entire procedure. The internal brake system means that this chair acts like a table during operations.

Tuned for the surgeon - the space under the back of the chair has been maximised to allow the surgeon to adopt the best possible ergonomic posture, both for the temporary position as well as the 12 o'clock position. Can be electronically fine tuned giving the surgeon precision control over the exact positioning.

Ergonomically optimised - the foot support, seat and back support can all be individually pivoted to any desired angle, allowing the DOC to be adapted to any patient. The DOC is equipped with foam "multilayer" upholstery giving the patient maximum comfort and safety. Free of seams and stitches allowing for quick and easy cleaning. It is uniquely mobile due to its electronically controlled centre wheel. This makes the chair light and easy to steer. The DOC can be remotely controlled, but hand controls or foot controls are also an option. All adjustments can be made by using pre-programmed buttons on the remote control.

Full electronic positioning - all adjustments can be electronically controlled including the braked wheels. The Dpower supply is rechargeable and equipped with a built in safety switch that makes the chair unmoveable when connected to the mains.

Trendelenburg - the Trendelenburg and reverse Trendelenburg position can be directly activated by a simple to use button on the remote control. This makes the seat of the chair pivot into the pre-programmed position.

MEDICAL

Surgeon Operating Stool

DOCKX Trippelmax

Chair for the Surgeon - the Trippelmax - has been developed for optimal mobility and comfort. The smoothly rolling chair is equipped very comprehensively with electronic brakes and an electronic or hydraulic height adjustment. For the electronic version you can choose for hand or foot operation. The chair is very stable and with its length-adjustable armrests and many other adjustments it is the perfect surgeon chair.

UNISONICS Ultrasonic Cleaning Tanks

Compact, easy maintenance design. Pressed stainless steel tanks. Australian Made.
